Full Stack Developer

SUMMARY

Full-stack developer with experience across React, REST APIs, ASP.NET (C#), FastAPI, and Python currently expanding into the MERN stack (Node.js, Express, MongoDB). Experienced designing relational database schemas, building secure REST APIs, and shipping responsive, production-ready interfaces end-to-end. Strong foundation in OOP, DSA, and applied ML integration.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, TypeScript, C++, Java, HTML/CSS

Frontend: React, Next.js, Bootstrap, Tailwind CSS

Backend: ASP.NET (C#), FastAPI, Flask

Databases: PostgreSQL, SQL Server, MySQL, Supabase, Prisma ORM

AI/ML: scikit-learn, Transformers (T5), Tesseract OCR, OpenCV, NLP basics

Cloud & Deployment: AWS, Microsoft Azure, DigitalOcean, Docker, Ngrok, Google Cloud

Development Tools: Git, GitHub, VS Code, Visual Studio, pgAdmin

Concepts: OOP, DSA, RESTful APIs, MVC Architecture, Agile Basics, SQL Optimization

Currently Learning: Node.js, Express.js, MongoDB (MERN stack), Mongo DB, AWS, Redis

PROJECTS

CDC Lab Accounts System *Freelance Project*

- Built a full-stack accounting & asset management platform using Next.js, TypeScript, PostgreSQL & Prisma.
- Role-based workflows for accounting, expenses, income, investments, assets & monthly reporting.
- Implemented secure authentication, business-rules & automated testing with Better Auth, Zod, Vitest, & Playwright.
- Link:** <https://github.com/itzzsaadi/cdc-lab-accounts>

SecureGuard Pro – AI-Powered Vulnerability Scanner *Final Year Project*

- Built an AI-driven C/C++ vulnerability detection platform using React, FastAPI, and PostgreSQL.
- Fine-tuned Qwen2.5-Coder with QLoRA for binary vulnerability classification and CWE prediction.
- Trained the model on a ~315K-row ICVul + DiverseVul dataset using tree-sitter AST features.
- Link:** <https://github.com/itzzsaadi/>

E-Commerce Web Application *Web Application Development Coursework*

- Designed & built a full-stack e-commerce app using ASP.NET (C#) in MVC Framework, SQL Server & Bootstrap.
- Implemented user authentication, product catalog, shopping cart & an admin panel for inventory & order management.
- Link:** <https://github.com/itzzsaadi/EcommerceProject>

AI Text Extractor & Toxicity Classifier *Personal Project*

- Python application that extracts text from images using OCR (Tesseract).
- A toxicity classification system using a LinearSVC model to flag harmful content in extracted text.
- Link:** <https://github.com/itzzsaadi/AI-Image-to-Text>

Advanced Library Management System *Database Coursework*

- Designed a relational database schema using SQL to manage library records & transactions.
- Link:** <https://github.com/itzzsaadi/Advanced-Library-Management-System>

EXPERIENCE

Freelance Full Stack Developer

Jan 2026 – Present

Self-Employed, Lahore, Pakistan

- Built websites, Developed management systems for small retail businesses.
- Managed projects from requirements to deployment and support, designed databases & backend systems.

Full Stack Developer Intern

March 2026 – August 2026

Quaid Soft, Lahore, Pakistan

- Developed and maintained server-side code using C#, ASP.NET MVC.
- Worked on front-end integration with JavaScript, HTML & CSS.
- Maintained database interactions and business logic for client ERP systems.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

2022 – 2026

University of Central Punjab (UCP), Lahore, Pakistan | CGPA: 3.46 / 4.0
